SAN CARLOS, Calif., Dec. 22, 2021 (GLOBE NEWSWIRE) -- Oportun (Nasdaq:OPRT), a mission-driven fintech company announced today that it has completed the acquisition of Digit (digit.co), a neobanking platform that provides automated savings, investing, and banking tools. According to the company, the acquisition of Digit further expands its A.I. and digital capabilities to provide hardworking consumers a holistic offering built to address their financial needs.

"This is a transformational deal that positions Oportun for even more future success," said Raul Vazquez, CEO of Oportun. "With this transaction, we are combining two mission-driven organizations with complementary services, capabilities, and member bases."

Oportun acquired Digit for approximately \$211.1 million, comprised of an aggregate of approximately \$112.6 million in cash and approximately \$98.5 million in Oportun common stock and/or restricted stock units to be settled in Oportun common stock on the basis of a price of \$24.477 per share of Oportun common stock, determined at the time of signing pursuant to the definitive agreement between the parties. Oportun also closed a financing facility from Jefferies to finance the cash consideration.

Digit is a neobanking platform founded in 2013 that provides its 600,000 paying members with personalized savings, investing and banking tools. Digit members can keep and integrate their existing bank accounts into the platform, or they can make Digit their primary banking relationship by opening new accounts via Digit's bank partner.

Enabled by A.I., Digit automatically sets aside funds for members by analyzing cash flow and recognizing how much can be saved and invested today, while remaining well within a member's immediate financial means.
